Type of resource

Theory of Change

Target group

Leaders, trainers, volunteers working in the IRTS field

Short description

TeamUp works to improve the psychosocial wellbeing of conflict-affected children aged 6 to 18. This is done through structured play and movement-based activities provided by trained facilitators. Children become aware of how their body works as well as how to engage with and trust in others. The TeamUp intervention was piloted and rolled out for children affected by conflicts in different settings such as refugee settlements in Uganda and community spaces and schools in Sri Lanka. TeamUp is in the second stage of becoming an Evidence-Based Intervention (EBI). Relating to Ukraine, the TeamUp intervention is quickly adaptable to an emergency response. The focus is on the immediate outcomes of the TeamUp Theory of Change:

- Positive experiences are (re)created
- Stress is reduced
- Protection concerns are noticed and referred

The SportForUkraine.org platform is developed by
